

# 5FR's Amazing Adventure

It was an amazing trip. I can't even begin to tell you how incredible it was. We had the best time ever. Let me tell you from the beginning.

First we went to the underground station and we waited for the train to arrive. When it came we all climbed on to the train. We all were looking for chairs. When we were sat down we were all talking and some people were playing a game. An example of a game is I spy with my little eye. Then we went off the train and walked to the museum.

This was how the museum looks on the outside. It looked gorgeous. I loved how it looked.

When we got to the Natural History Museum, I was amazed by what I saw. I know I had been before but we still saw lots of things that we hadn't seen before. I just wanted to see more and more and I wanted to explore.

Then we had to go to the workshop. Inside the workshop, we were scientists and we had the most fun. We imagined we were in a different land that no one has dared to step foot on. We found rocks as well.

When we finished the workshop we went to eat. After that we went to see a model of a moon, a dinosaur that was moving and plants.

We finally went back on the train and we all were playing talking again. We came back to school and it was home time. I was tired. Then I took my bag and coat and went home.

This was one of my favourite things in the museum. I kept on staring at it. It looked like it was about to eat my hand. It was fake but it looked real.
