

# 5FR's Astonishing Trip!

Everyone in 5FR came on an unbelievable trip to the Natural History Museum. On the journey, we first started off by walking to East Ham Station, then we rode the train until we had reached our destination - South Kensington Station - and then we walked tirelessly to the museum. This was when the fun started!

There were so many magnificent things to see. They were displayed all along the walls, and some things were absolutely COLOSSAL

During my time in the dinosaur exhibition, I saw many skulls and bones that were from the times of the dinosaurs (65 million years ago) and there were many other animals that were shown. In my opinion, my favourite part of the spectacular trip was the moving dinosaur that was almost touching the ceiling (I still don't know how it moved!).

In the workshop, there were so many different types of fossils and rocks in one place that we all described and measured the length and weight of them.
